

# The MochaChain Whitepaper

## v1.0.1

Development Team (Discord): WillWam#4633, Shadow42👹👻#5490,  
Farpa#9798

Please contact the development team if you wish for something to be revised - as just some of the members of a decentralized blockchain we feel we have the responsibility to uphold our *Equal Rights & Equal Voices* community clause.

# MOCHAChain 3 Community Clauses

**The following clauses are undisputable community clauses that are to be upheld by all network owners in our communities. These**

**clauses and guidelines exist to reduce toxicity & overall bad forms of character. Community moderators may cite this resource.**

**Amendments may be made only with a Masternode consensus.**

## ***1 - Equal Rights & Equal Voices***

**All community members have a right to a voice on any MOCHA owned message boards & forums, unless a community member has violated any other basic community clause or rule. If a moderator of a forum or message board discriminates based on race, gender, or politics, they shall be banned from said moderation role.**

**This DOES NOT apply to any of the following actions:**

- **Extremist (political/non-political) views - Having an opinion and talking about it is different from carrying out a crime for it.**
- **Racism**
- **Sexism**
- **Minority discrimination of any kind**
- **Personally insulting a fellow member of the MOCHA community**

## ***2 - Anti Toxicity***

**No toxicity or any demonstrations of bad forms of character is allowed on any MOCHA owned message boards & forums. Violating this rule will not get you banned, but you will be warned.**

**Also remember - you are talking to real people, you're just in an online environment.**

# ***3 - No Promoting Scams, Ponzi Schemes, or Questionable Crypto***

**We cannot stress enough how important this particular clause is. More than 3 billion dollars a year are lost to general scams, and this disease will not spread to MOCHA owned forums and message boards. On top of this, any coins that are promoted in authorized categories and channels of forums and message boards will be checked by moderators.**

## **Whitepaper**

**MochaChain (MOCHA) is a PoS / Masternode hybrid cryptocurrency that supports decentralization in every form. Every developmental decision aside from necessary bug fixes will be submitted to masternodes to vote on. If a decision does not reach a majority of “for” votes, the decision will be discarded, but still may be brought up for another vote at any time. In the almost impossible event of a tie, the decision will be posted to a viewable Discord channel where the entire network may vote, and express their opinions. MochaChain’s overall goal is to create a digital democracy that has control over every aspect of the network, so no developer will ever have complete control. By rule of the MOCHAChain whitepaper, developers may not make any impactful network decision without a vote.**
